DETAILED ACTION

Reasons for Allowance

The following is a statement of reasons for the indication of allowable subject matter:

Amendments and arguments filed by applicants on 8/22/2006 have overcome rejections under 35 U.S.C. 112, first and second paragraphs, and prior art rejections under 35 U.S.C. 103.

Applicants convincingly argue in the response filed 10/03/2003 that the prior art of Mundy, U.S. Patent 4,656,127, does not disclose analysis of multiple interrogation positions and additional probes. Instant claims 82, 85, 88, and 90 recite multiple different probes comprising a perfectly matched probe with a plurality of interrogation positions and three mismatched probes for each interrogation position, which are different from each other and the perfectly matched probe at an interrogation position. Mundy does not disclose using more than two probes.

Any comments considered necessary by applicants must be submitted no later than the payment of the issue fee and, to avoid processing delay, should preferably accompany the issue fee. Such submission should be clearly labeled "Comments on Statement of Reasons for Allowance."

Title

The title of the invention is not descriptive. The title has been changed to:

"A method of comparing a target nucleic acid and a reference nucleic acid."

Conclusion

Claims 82-94 are allowed.
